## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 6-13, 22 and 25-28 are allowed.

The following is an examiner's statement of reasons for allowance: the amendment to the claims filed 26 October 2006, is sufficient to overcome the rejection of record over Qureshi (US Patent 6,456,305) and Agrawal (US Patent 6,081,816). While the combination of Qureshi and Agrawal teach a GUI configuration program similar to that of independent claims 1, 7, 9 and 22, each and every limitation in the claims is not present in the combination. Specifically, Qureshi and Agrawal fail to teach the embedding of a tiered sizing schema, readability constraints, and a minimum number of character spaces in original equipment manufacturer (OEM) hardware and software. This implementation of a tiered sizing schema in OEM hardware and software is not found in the cited prior art. A further prior art search failed to produce any relevant results.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
